Dear Sir:

**SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT**

In compliance with the duty of disclosure set forth in 37 C.F.R. § 1.56, Applicant wishes to bring the following items to the attention of the Examiner. A copy of each document (except the U.S. application) is enclosed for the convenience of the Examiner.

No representation is made, and no representation is intended, that more relevant material does not exist, or that the order of presentation of this material in any way reflects

its relative pertinence. The references cited below are not intended to constitute an admission of any kind.

Applicant wishes to bring to the attention of the Examiner the following documents:

- (1) S. Farris, "Plunger Conveyed Chemical System For Plunger Lift Wells", Composite Engineers, Inc., compositeengineers@gbronline.com, 2 pages; and
- (2) Sam Farris, U.S. Patent Application entitled "Method and Apparatus For Enhancing Oil and Gas Flow in a Well".

The document entitled "Plunger Conveyed Chemical System for Plunger Lift Wells" was obtained from the internet in July. Applicant has no knowledge of the date the document appeared on the internet. When opened in pdf the properties page (a copy of which is enclosed) indicates a date of creation of the document as 5/16/2003, but that date is suspect as the page indicates the document was modified before it was created. Thus, Applicant is uncertain of the date of creation of the document as well as the date it was posted on the internet.

The examiner is also advised of a the **potential of an interfering application**. Applicant has reason to believe that there is a pending application entitled METHOD AND APPARATUS FOR ENHANCING OIL AND GAS FLOW IN A WELL naming Sam Farris as the inventor. Applicant's request for identification of the serial number and filing date of the application was declined by Mr. Farris' attorney. Thus, Applicant requests the examiner determine whether such an application was actually filed and if so to give it appropriate consideration
